

TESTIMONIAL

"It's great to see 21st Century technology that can replace 1940's technology. The McGRATH® MAC is really easy to become fluent with because it's just like a regular laryngoscope but has extra benefits over a direct laryngoscope. The enhanced on-screen view is a tremendous advantage while less force is exerted on the laryngeal structures. This device also creates the possibility of improving the grade of laryngoscopic view whilst using a conventional laryngoscopy technique."

STEPHEN LUNEY, M.D., CONSULTANT NEUROANESTHESIST, ROYAL VICTORIA HOSPITAL, BELFAST, UK

TESTIMONIAL

"For everyday practice it is a great device and has the potential to make us more successful every time."

IRENE OSBORN, M.D. DIRECTOR, DIVISION OF NEUROANESTHESIA, MOUNT SINAI MEDICAL CENTER, USA

TESTIMONIAL

"The McGRATH® MAC brings the most advanced airway management technology to routine intubation."

MICHAEL S. HIGGINS, PROFESSOR, DEPARTMENT OF ANESTHESIOLOGY, VANDERBILT UNIVERSITY MEDICAL CENTER

Technical Specifications

McGRATH® MAC Handle
Size: 180mm x 68mm x 110mm
Weight: 200g
Power: Proprietary 3.6V Lithium Battery Pack (c. 250 minutes)
Light source: High intensity LED
Display: 2.5" LCD colour display
Camera: CMOS
Materials: Durable medical grade thermoplastics with reinforced structural alloy core.
The device and packaging are latex free

McGRATH® MAC Disposable Blades

Material: Medical grade optical polymer
Packaging: Packaged sterile for single use

Regulatory

This product complies with EN 60601-1 and EN 60601-1-2 safety standards. The CE mark indicates that it meets the requirements of European Council Directives 93/42/EEC and 2007/47/EC concerning medical devices.

The device is regulated in the USA under FDA Regulation Number 868.5540 and device listed under the name McGRATH MAC.

McGRATH® MAC

It's versatile. The McGRATH® MAC can be used as a direct or indirect view laryngoscope. It utilizes all new single-use McGRATH® MAC blades made from robust optical polymer. It's supported by an internal reinforced alloy chassis and CameraStick™ which delivers 'steel-like' rigidity. Its super-slim blade profile brings improved patient access and limits dental contact. Its unique, minute-by-minute countdown battery technology can last for weeks. It's compact, it's immersible and it's ready for the unexpected.

Video is here to stay, be part of it.

New video format to reduce blind spot
Vertically aligned optics display an earlier visualization of the tube to address tube induced trauma.

Video comes as standard
2.5" LCD monitor displays a clear view of the vocal cords and laryngeal inlet for an improved anatomical view.

Portable & easy to use
Easy to use "switch on & go" technology. Its compact size and cable free design means it can go anywhere with you.

Battery technology (c. 250 minutes)
The long lasting power source provides peace of mind as well as an accurate minute-by-minute on-screen battery charge indicator.

Direct or Indirect use
The McGRATH® MAC can be used as a direct or indirect laryngoscope with or without the aid of a stylet.

Robust
Tested to twice industry standards, the McGRATH® MAC is designed to withstand tough clinical environments.

Guaranteed sterility
Infection control is achieved with sterile packaged blades and immersible handle for High Level Disinfection.

The highly refined McGRATH® MAC combines the strengths of the global standard Macintosh with McGRATH® technology.

New McGRATH® MAC blade
Made from a robust optical polymer and supported by an internal reinforced CameraStick™, the McGRATH® MAC slimline single-use blade delivers a 'steel-like' rigidity.
