

AIRSIM ADVANCE COMBO BRONCHI

The AirSim Advance Combo Bronchi is the ‘All in one’ trainer for your airway management needs, providing anatomically correct detail down to the fourth generation bronchi together with the addition of our ‘real feel’ skin covering and also providing both Cricothyroidotomy and Percutaneous Tracheostomy features. This model combines together the skin covering of the AirSim Advance Bronchi with all the combined features of the Crico and Traci model

Product Name	Code	Description
AirSim Advance Combo Bronchi	CTC95100	AirSim Advance Combo Bronchi model
AirSim Advance Combo Bronchi	CTC95101	AirSim Advance Combo Bronchi with Breakout teeth

PRODUCT FEATURES

The AirSim Advance Combo Bronchi can also be used in a similar manner to the AirSim Advance Bronchi and can cover an extensive range of training requirements including Naso and Endo tracheal intubation.

The AirSim Advance Combo Bronchi unit will provide a solution to your training needs in:

- Diagnostic bronchoscopy.
- Lung isolation techniques using left and right endobronchial tubes and bronchial blockers.
- Full use of supraglottic devices
- Effective bag mask ventilation
- Lung suctioning techniques.
- Needle/Surgical Cricothyroidotomy
- Percutaneous Tracheostomy

As with all Trucorp products this model is presented in an aesthetically pleasing lightweight frame with a lung bag included to illustrate a successful tracheostomy procedure.

Trucorp provide the following consumables to ensure optimal performance.

- RSN10005 - Replacement neck skin attachments (5pk)
- CL100 - Replaceable Larynx Combo
