

LaEncore Plus

Reusable Laryngeal Airway - Features and Benefits

LaEncore *Plus*

Reusable Laryngeal Airway

The upper airway is one of the most sensitive regions of the body.

LaEncore *Plus* has been designed to the highest quality. The product's unique features allow ease of insertion, increased level of first-time placements and reduced trauma to soft tissue.

Key Benefits:

- Reinforced tip reduces the risk of the mask tip folding back and causing trauma for the patient
- Stipple finish on the cuff sealing surface establishes a secure airway
- Unique one-piece design eliminates the occurrence of misaligned airways and the need for repositioning of the airway
- Made from AmSIL allows for flexibility whilst still maintaining a lumen resistant to kinking and occlusion
- Colour-coded stylette enables the airway to be pre-formed for ease of insertion
- Large internal lumen diameter to assist with the passage of orotracheal tubes during intubation via the airway
- Colour-coded inflation line allows for easy identification of airway size before and after placement
- Pinch clamp for auto-inflation which is efficient for the user and ensures "inflate to fit" technique
- Pilot balloon acts as a pressure indicator to prevent over-inflation
- Clear indelible print and markings strategically placed allows for confirmation of placement and positioning
- Can be steam sterilized at 134°C; warranted for 40 uses
- MRI compatible
- Latex free

Product Information:

Code	Description	Box Qty	Colour Code
AML500100	Size 1, Neonatal	5	Blue
AML500150	Size 1½, Paediatric	5	Grey
AML500200	Size 2, Infant	5	White
AML500250	Size 2½, Child	5	Yellow
AML500300	Size 3, Child/Small Adult	10	Green
AML500400	Size 4, Adult	10	Orange
AML500500	Size 5, Large Adult	10	Red
